

At Electri-Tech, safety is our #1 priority. Our goal is to keep our employees, clients & everyone safe at all times. All employees understand the importance of safety. Safety begins the moment our employees step foot on a jobsite. Electri-Tech insists on staying current with up to date OSHA regulations and Industry standards. All supervisors and trade personnel are trained to follow safety measures at all times and implement safety policies consistently on all of our projects.

We conduct safety meetings on a regular basis, all supervisory personnel are required to have a minimum of OSHA 10-hour training. This aggressive safety program is one that we at Electri-Tech are extremely proud of.
